CNC System
User-friendliness, productivity and security

Flexium+
The new reference in terms of ergonomics in the machine tools industry

Optimum user-friendliness!

- Tactile operator desk with multi-point functionality
- Built-in Flexium3D simulation
- Modern, ergonomic and specially configured HMI
- Built-in virtual control desk (machine desk, QWERTY and ISO keyboard)

Productivity guaranteed!

- No-compromise speed and precision for the best surface quality
- Long product service life, after-sales service for up to 20 years or more
- Compatibility with old CNC NUM systems

Perfect technology!

- NUMDrive X, a compact, modular and high-performance regulator
- Significantly reduced cabling thanks to "single-cable" motor concept
- Built-in NUMSafe security functionalities, certified to SIL 3
- Flexium Tools – unique, modern development tools which comply with the IEC 61131 standard
