Entertainment and Transportation Products

- All products are topcoated for superior resistance to chemicals and the environment.
- Caliper range from 3.0 to 9.5 mils (76 to 241 µm).

Considerations	Grade Choice
For long life images and legibility in hot environments—like the car dashboard	**HeatSafe®**
For exceptional press printing capability, long-life images and application of magnetic striping on the back side	**PressPro® M**
For exceptional back press printing capability to give rich 4-color graphics and long life images that are resistant to handling	**PressPro®**
Applications where high water resistance or sheet strength is needed	**PolyTherm®**
For long life images that are resistant to handling and the environment plus application of magnetic striping on the back side	**Résiste® M**
For long life images that are resistant to handling and the environment	**Résiste®**
For applications where an environmental product is preferred—contains 10% post-consumer waste	**Résiste® RC**
For applications where moderate resistance to handling and the environment is needed	**Alpha® Plus**
