LIBERTY DISPLAY GROUP

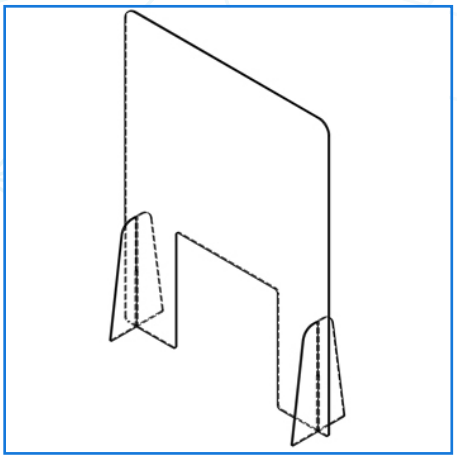

OVER 30 YEARS of EXPERIENCE

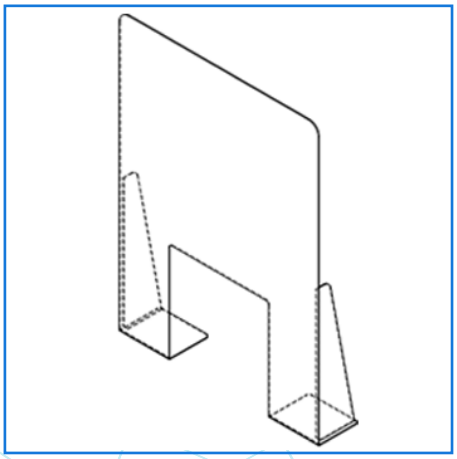

Face Shields & Barriers

Face Shields – Made from .020” PETG. The foam forehead piece and elastic band allow comfort, while the lightweight shield offers full-face protection. The shields also offer low distortion & minimal fogging.
Two size options available:
8.5 inch (Standard) and 10 inch.
Minimum quantity of 10/bundle
(color of the elastic strap will vary).

Plexi Barriers – Made of Acrylic or PETG. These shields are a great option as they have high clarity and are lightweight. More importantly, these types of barriers can easily be cleaned and disinfected. Whether you need Knock-Down Barriers, Multi-Purpose Barriers, 1-Piece Barriers or something custom made, LDG can help.
