25 YEARS IN BUSINESS
1998-2023

Lockout Tagout Procedures & Arc Flash Labeling Services

On-site Custom Lockout-Tagout and NFPA 70E Arc Flash Programs, Procedures, Labeling & Management Software

Professionally developed site-specific OSHA compliant solutions

Step-By-Step Custom Lockout Tagout Procedures

SafetyNet does the heavy lifting, so you don't have to!

iLockitOut™ Energy Control Procedure Development

- ✓ Onsite equipment inventory and energy control point identification
- ✓ Step-by-step equipment-specific lockout point identification
- ✓ Onsite energy control point labeling
- ✓ Equipment and energy control point photos
- ✓ Completed procedures with QR code mobile access
- ✓ Onsite lockout equipment assessment
- ✓ Optional Services
  - iLockitOut companion mobile application
  - Annual Energy Control Program and procedures audit and update (OSHA required)
  - QR Code 3" x 5" UV labels for aggressive environments
  - Heavy laminated procedures
  - Protective clear plastic sleeves with grommet
  - Procedures printed on metal
  - Energy Control Program Gap Assessment
  - Authorized person training

iLockitOut™ Mobile Management Application

- ✓ Mobile QR Code scanning for step-by-step lockouts
- ✓ Dashboard with real-time equipment lockout status
- ✓ Mobile signature requirement to prove compliance
- ✓ Cloud-based historical lockout / tagout reporting
- ✓ Ability to customize existing procedures yourself
- ✓ Unlimited software support and training

What makes our program better?

- ✓ Equipment-specific step-by-step procedures for top-of-the-line safety
- ✓ Easy-to-follow procedures with energy control point photos and locations
- ✓ 25 Years' experience developing procedures and training workers
- ✓ Assessing your lockout / tagout equipment to make sure they meet all requirements
- ✓ Comprehensive and effective procedures that reflect all safety requirements.
- ✓ Keeping workers safe while proving compliance with signed procedure reports.

"iLockitOut keeps workers safe with step-by-step procedures to ensure ZERO energy when locking out equipment with required signature accountability!"

I-LockitOut for Safety!

NFPA Arc Flash Assesment & Labeling Services

NFPA 70E Onsite Services

- ✓ Onsite NFPA Electrical Enclosure Assessment Report
  - Breaker panels, disconnects, control panels, transformers, MCCs
- ✓ Electrical enclosure ID labeling and inventory development
- ✓ PPE and arc flash boundary determination
- ✓ Compliant NFPA 70E arc flash labeling includes:
  - Unique label for each enclosure
  - Durable 3”x 5” UV arc flash warning labels
  - QR Code on the label for mobile app access
- ✓ Mobile Energized Electrical Work Permit with signature
- ✓ Optional:
  - NFPA 70E Arc Flash Low & High Voltage training
  - NFPA 70E Electrical Program Assessment and Development
  - Annual and 5 Year maintenance plans available

iLockitOut™ NFPA 70E Management Application

- ✓ Mobile QR Code enclosure-specific PPE requirements
- ✓ Mobile QR Code Energized Electrical Work Permit
- ✓ Mobile signature requirement before energized work is performed
- ✓ Historical cloud-based electrical permit reporting
- ✓ Unlimited software support and training

“Labels alone do not protect the workers from electric shock or from arc blast! Easy and effective labels, training, and accountability will.”

– Steven Brooks, President SafetyNet Inc.

What makes our program better?

- ✓ Assessments are based on the equipment and the location
- ✓ Unique and specific PPE requirements for each enclosure using the table method
- ✓ Keeping workers safe by assessing each enclosure and determining practical safe boundaries
- ✓ Assessing PPE to ensure it meets all site-specific requirements
- ✓ Comprehensive and effective labels that indicate safety requirements
- ✓ Mobile QR Code Energized Electrical Work Permit
- ✓ Mobile QR Code requires workers to complete the permit before starting work
- ✓ Keeping workers safe while proving compliance with signed permits before energized work is performed.

iLockIt@ut®

"We don't give you a problem, we provide you with a solution."

– Steven Brooks, President SafetyNet Inc.

Cloud-based Application to Manage Your Lockout & Arc Flash Program

Cloud-based Applications

- ✓ Energy Control Procedure Management
  - Arc Flash Program Management
  - QR Code Mobile Access
- ✓ Mobile lockout entry
  - Mobile signature certification
